

Strong profile. Strong performance.

EURO❄️FROST 6

The EURO❄️FROST 6 is designed to offer much better performance in a wide range of weather conditions.

In particular, the improved tread pattern guarantees excellent traction and shorter breaking distance on snowy and dry roads.

Strong profile. Strong performance. The new standard of grip and safety.

Highlights

Improved snow traction

Thanks to increased sipe density the tyre offers improved tyre to snow interaction. As a result, traction on snow is exceptionally good.

Excellent handling on snowy roads

Many block edges at different angles provides optimum grip in all driving directions. This results in outstanding handling on snow covered roads.

Better dry handling performance

Its wide shoulder blocks increase block stiffness and ensure better transmission of forces. Thus, the tyre offers high level of handling performance on dry roads.

Performance Diagram

— EURO*FROST 5 = 100 %

— EURO*FROST 6

LI = Load index
SI = Speed index
H = up to 190 km/h
T = up to 210 km/h
V = up to 240 km/h
XL = Extra load
FR = Rim protection

EU tyre label categories:

= Fuel Efficiency, = Wet Grip,
dB = Value in decibels, = Noise,
 = Snow Grip, = Ice Grip

Tyre dimensions:

Speed index: **T/H/V**

Rim size in inches: **14 – 20**

Tyre widths in mm: **155 – 275**

Tyre cross section: **70 – 40**

EU label: **C-E / C / 71-73 B**
