

All set for snow.

The new braking force.
Driving out winter.

SOFT*FROST 200

The SOFT*FROST 200 offers high performance level in any winter weather conditions. An effective pattern design guarantees excellent traction and lateral stability on snow and ice.

Especially, the braking distances on icy roads are extremely short.

All set for snow. The new braking force. Driving out winter.

Highlights

Direct force transmission on snow

The elevated grooves minimize block distortion and substantially increase the wet contact area with the road. The result? Enhanced wet grip and significantly shorter wet-braking distances.

Good contact on wet roads

An outstanding number of active grip edges entails an excellent longitudinal transmission of power – providing optimal traction and braking on snow.

Short braking distances on extremely icy roads

The high sipe density and a high number of edges lead to improved force transmission. This advanced design provides maximum safety by seriously reducing braking distances on ice.

Performance Diagram

— SOFT*FROST 3 = 100 %
 — SOFT*FROST 200

Tyre dimensions:

Speed index: **T**
 Rim size in inches: **14 – 19**
 Tyre widths in mm: **175 – 265**
 Tyre cross section: **70 – 45**
 EU tyre label: **D-E / E / 71-73 B**

LI = Load index
 SI = Speed index
 T = up to 190 km/h
 XL = Extra load
 FR = Rim protection

EU tyre label categories:

= Fuel Efficiency, = Wet Grip,
 dB = Value in decibels, = Noise,
 = Snow Grip, = Ice Grip
