

Grip the road with high precision

ULTRA * SPEED 2

For compact-class and middle-class vehicles and SUVs.

The ULTRA * SPEED 2 masters rapidly changing summer weather, offering the best possible grip and precise handling even at high speeds on wet roads.

Meets precision handling and comfort level

Highlights

High handling precision

Optimised tread design with enhanced tie bars ensure pattern stability as well as pressure distribution in the contact surface. This improves driving on curvy roads and offers reliable braking performance in dry conditions.

Reliable wet performance

Numerous notches in combination with the open inner shoulder and wide circumferential grooves provide very good water dispersion and improve grip and braking on wet roads.

Low rolling resistance & high mileage

The new generation of silica-enriched tread compound with new polymer technology reduces rolling resistance and offers longer tyre service life with eco-friendly performance.
